

SAEED ULLAH

Data Analyst | Business Intelligence

Riyadh, Saudi Arabia · 0569883507 · Saeedtech990@gmail.com · [LinkedIn](#) · [GitHub](#) · Iqama: Transferable

PROFESSIONAL SUMMARY

Results-driven Data Analyst with a background in Computer Science and hands-on experience across Excel, SQL, Power BI, and Python. Skilled in collecting, cleaning, and analyzing large datasets to deliver accurate reporting and actionable business insights, with a portfolio of BI dashboards, DAX-driven reporting models, and automated workflows spanning sales, finance, real estate, and risk analytics. Combines strong technical execution with practical operational experience managing high-volume client transactions, giving equal weight to data accuracy, process reliability, and clear business communication. Committed to supporting data-driven decision-making in fast-paced environments.

TECHNICAL SKILLS

Data Analytics & BI: Data Collection, Cleaning & Transformation, EDA, KPI Dashboard Development, Trend & Root Cause Analysis, Data Validation & Quality Assurance, Reporting Automation

Programming & Databases: SQL (Joins, Aggregations, CTEs, Window Functions), Python (Pandas, NumPy, Matplotlib, Seaborn), PostgreSQL, MySQL

BI & Visualization: Power BI (Data Modeling, DAX, Power Query, Interactive Dashboards), Tableau, Data Storytelling

Productivity Tools: Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, Power Query, SUMIFS, Macros), Google Sheets, PowerPoint, Git & GitHub

Professional Skills: Analytical Thinking, Problem Solving, Attention to Detail, Process Improvement, Cross-Functional Collaboration, Communication & Data Presentation

PROFESSIONAL EXPERIENCE

Data & Operations Associate

March 2026 – Present

Travel & Visa Services Agency · Riyadh, Saudi Arabia

- Managed end-to-end ticketing, visa processing, and government service requests — including Absher transactions, passport renewals, and bank account setup — for a client base of 1,000+, maintaining accurate documentation at every step.
- Resolved visa-related issues and case discrepancies across a high volume of client files, applying consistent data-quality checks to reduce processing errors and rework.
- Coordinated across banking, immigration (Absher), and passport authorities to move multi-step client cases through to completion, improving turnaround time and client satisfaction.
- Maintained structured records of client transactions and service requests, supporting operational reporting and process consistency across a high-transaction environment.

DATA ANALYTICS PROJECTS

European Real Estate Market & Pricing Analytics Dashboard | Power BI · DAX · Data Modeling · Bing Maps

- Built an interactive Power BI dashboard analyzing 5,000+ property listings across 10 European cities to surface pricing, market-speed, and compliance risk patterns hidden in standard reporting.
- Designed DAX measures — Price Growth %, Price per m², Days on Market, Market Speed Classification — and a pricing risk model flagging Overpriced vs. Below-District listings by owner and property domain.
- Integrated geographic map visuals to track price growth by city and country, giving stakeholders a location-driven view for investment and pricing decisions.

SQL Sales Analysis — 49,000+ Transaction Dataset | PostgreSQL · pgAdmin 4 · Power BI

- Queried and analyzed a transactional dataset of 49,000+ sales records using multi-table joins, aggregations, and window functions to identify revenue drivers and order patterns.
- Broke down performance by product category, time of day, and order size, packaging findings into a presentation-ready summary for stakeholder review.

Credit Card Fraud Risk Analysis Dashboard | Power BI · Drill-Through Reporting

- Analyzed transactional data to quantify fraud exposure by type, finding identity theft accounted for 24% of flagged transactions, presented in a drill-through dashboard aligned with compliance reporting standards.
- Built temporal trend visuals surfacing peak fraud windows and industry-level fraud concentration, helping risk teams prioritize investigation resources.

- ▶ Conducted data audits and inconsistency checks across the source dataset prior to modeling, applying data quality standards throughout the pipeline.

Car Sales Performance Dashboard | *Power BI · SQL · Excel*

- ▶ Designed a multi-page BI dashboard tracking YTD, MTD, and YoY sales metrics across pricing segments and regions, enabling stakeholders to monitor performance without manual reporting.
- ▶ Automated data transformation via Power Query, cutting estimated manual data-preparation effort by 60% versus the prior spreadsheet-based workflow.
- ▶ Structured the data model using star schema principles, ensuring fast load times and reliable cross-filter behavior across 12+ months of transactional data.

Diwali Sales Analysis — Customer & Revenue Segmentation | *Python · Pandas · Matplotlib · Seaborn*

- ▶ Cleaned and analyzed 11,000+ customer transactions using Python to profile purchasing behavior by demographic and region for a festive-season sales dataset.
- ▶ Identified that female customers drove roughly 70% of total revenue and that the 26–35 age group was the highest-spending segment across nearly every state.
- ▶ Segmented top-value customers by marital status, occupation, and category preference, providing a data-backed customer profile for targeted campaign planning.

EDUCATION

Bachelor of Science — Computer Science 2019 – 2024

Relevant coursework: Database Management Systems, Data Structures & Algorithms, Statistics and Data Analysis, Information Systems, Software Engineering

CERTIFICATIONS

- ▶ Microsoft Power BI — Power BI Desktop, DAX, Data Modelling, Interactive Dashboards, Data Visualization
- ▶ Advanced Excel — Pivot Tables, Power Query, Charts, Formulas, Macros
- ▶ SQL / MySQL — SQL Queries, Joins, Subqueries, Database Management, Reporting
- ▶ Data Analysis with Python — NumPy, Pandas, Matplotlib, Seaborn
- ▶ Data Analytics & Business Intelligence Training Program — Google Sheets, Excel, Power BI, R, RStudio, SQL, Tableau
- ▶ Introduction to Finance & Accounting — Financial Statements, Bookkeeping Fundamentals, Cost Analysis
